

**Universal wet paraffinating agent for all kinds of yarn on bobbins:**

## **KATAMIN UNI**

- ✓ • suitable for cotton, viscose, linen, PES, PAN, PA and wool
- ✓ • high smoothness of yarn
- ✓ • easy to apply
- ✓ • even distribution over the whole bobbin
- ✓ • high productivity in wet paraffinating

After dyeing and rinsing,  
fresh bath:

PES:	20 min 75°C
WO:	20 min 60°C
PAN:	20 min 60°C
PA:	20 min 60°C
CO:	20 min 40°C
CV:	20 min 40°C
LI:	20 min 40°C

1-3% KATAMIN UNI  
pH 5 (acetic acid)

### **ADVANTAGES:**

#### **For knitting:**

- no hard paraffin necessary
- high-speed rewinding possible
- excellent gliding properties
- reduces dust formation
- reduces loop damage
- higher quality of knitted fabric

#### **For weaving:**

- no rewinding of bobbins necessary
- reduces dust formation
- reduces yarn break rate
- increases weaving efficiency
- imparts good anti-static properties
- higher quality of woven fabric
