

# SETAVIN PE

High concentrated levelling agent for dyeing of polyester

## Levelness test = Shading test with critical disperse dyestuff combination on PES

## Dispersing properties in HT dyeing

Dyeing at 115°C, cool down to 80°C, vacuum filtration through blue ribbon paper

### Disperse Blue dyestuff

without SETAVIN PE

### Disperse Orange dyestuff

without SETAVIN PE

- highly concentrated levelling agent for PES
- even building up of shade throughout the entire temperature range
- high dispersing effect even in case of extremely high liquor turbulences
- low foaming
