

Remazol Scarlet RGB

Remazol Scarlet RGB is an extension in colour space of Remazol RGB/Ultra RGB to bright and brilliant scarlet shades

It is the ideal basis in the application area of so-called 'Marlboro' or 'Coca-Cola' red shades. The new dye is very economical and extremely bright. It provides fit-for-purpose fastness properties. The light fastness restricts the dye from medium to dark shades.

Key Features and Benefits

- Economic Scarlet for strong red shades in combination with Remazol dyes[insert graph]
 - Special combination partners to achieve most brilliant shades are Remazol Orange RR, Remazol Red RGB or Remazol Ultra Red RGB
 - High colour yield and excellent build up
 - Comparable shade to Levafix Scarlet E-2GA
 - Fit-for-purpose fastness profile
 - Dischargeable for colour prints (not white dischargeable)
 - Suitable for exhaust, continuous and CPB application
 - Low neutral substantivity
-
